Hardcore what is wrong and what about that fucking thing

Billions you spend all your money and you are dreaming

I have seen every film she's doing everything

I feel like a thief stealing from TV screens

A fluffer is all right, satisfy me all night

A hardcore queen would be great, just one take

Hardcore nobody's watching and nobody buys

Millions looking to your neighbours look into your eyes

It's the dream of the masses every social classes

No one knows anyone nobody asked for that fun

Whores what a disease you are necessary, please

Lying society is disgusting me
