### "Let's Start Now"

Visit "[Let's Start Now](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Save the world with all your energy  
Stop the wrong done to environment  
Children cry - it's an emergency  
There's no better sign - for a government

Careless men have already begun  
To destroy the world of our young  
Think of them like you think of yourself  
Fight for it - fight for the right of heath

All statesmen - what have you done  
The forcast - is the world will die  
All statesmen - have slept too long  
The public opinion cries

Let's start now to change it  
Tomorrow ist too late  
For the sake of nature  
Let's not hesitate  
Let's start now to save the world  
Come and help for the good things on earth

History - showed us ever since  
What destroys - just everything we love  
Wake up now - from your indifference  
After all this could be our last chance
