"Ghost In The Bottle"

The dream is over
And the last shots were fired
The eulogy repeated seems so uninspired
The casualties were counted
And were the only ones dead

Brother I'm drowning in
Our own blood we've lost

But I've heard the ghosts in these bottles
Will sing our song long after we've gone

So let's own this
That we broke this, here's to the end
So let's face it but embrace it
Here's to the end
Goodbye my friend

The trenches won't be the same without you
Your memory will always be there
I know exactly what everything
You went through
Remember I was right there next to you

And I wish the ending was
As beautiful as the story
