I drove around this town  
It looks the same as 1998  
When everyday we drove around this town  
Trying to find our way

How did the lights start setting on my dear  
New York, New York  
I'll make this loud so maybe you can hear

You know I love love love what you've got  
I know know know that I'm not  
The greatest brother that girl could have  
Promise me you'll drive around with me soon

I drove around this town like 90  
But not much is the same  
Well I still pray a lot for you  
I do it every day

How did the lights start setting on my dear  
New York, New York  
I'll make this loud so maybe you can hear

You know I love love love what you've got  
I know know know that I'm not  
The greatest brother that a girl could have  
Promise me you'll drive around with me soon

You know I love love love what you've got  
I know know know that I'm not  
The greatest brother that a girl could have  
Promise me you'll drive around with me soon
