

Vice Grip "Digital Butterfly"

Visit "[Digital Butterfly](#)" on MotoLyrics.com

If I'm sleepin then I'm dreaming
And I'm lost somewhere in space
Oh the pills have trapped me here
They have put me in my place
The doctor said they'd help me
But they only make it worse
Strings of data behind my eyelids
Flowing gently back and forth
Flowing back and forth

Digital butterfly
Helping me sleep at night
Helping me sleep at night
Digital butterfly
Helping me sleep at night
Helping me sleep at night

The nightmare's behind me
And so is all your love
Oh the bottle's almost empty
And my dreams are filled with drugs
The Lunesta starts working
But I'm craving something more
I'm floating and I'm flying
Heading straight through the door
Going straight through the door
