When I look into your eyes

People always talkin' 'bout, people always run their
mouth

But when I hold you there's no doubt, my love for you is
true

Before my life was ups and downs and happiness
I used to chase around

That's why, I'm glad you came 'cos now, there's no
substitute

And I don't care, whatever may come our way
It's you and me, forever and ever to be 'cos

When I look at you, I see me from my head to your toes
Every part of me
And everything you do, I did too
'Cos I'll always be a part of you

When I look at you, I see me from my heart to your soul
I'll always love you so
And everything I do, you'll do too
'Cos you're every little part of me

I've seen how easy things can change and people
never stay the same
But baby, ever since you came, you made me feel
secure
Yes, I think you should know that people gonna come
and go
Be assured of this one thing, I will still remain

And I don't care, whatever may come our way
It's you and me, forever and ever to be 'cos

When I look at you, I see me from my head to your toes
Every part of me
And everything you do, I did too
'Cos I'll always be a part of you

When I look at you, I see me from my heart to your soul
I'll always love you so

And everything I do, you'll do too
'Cos you're every little part of me

I know that there will come a day when you have to go
away
But you have no reason to fear, I promise I'll be here
If someone ever [Incomprehensible] your heart

And you feel your world is torn apart
My love for you will bring you through hard times
I'll help you be strong

When I look at you, I see me from my head to your toes
Every part of me
And everything you do, I did too
'Cos I'll always be a part of you

When I look at you, I see me from my heart to your soul
I'll always love you so
And everything I do, you'll do too
'Cos you're every little part of me

When I look at you, I see me from my head to your toes
Every part of me
And everything you do, I did too
'Cos I'll always be a part of you

When I look at you, I see me from my heart to your soul
I'll always love you so
And everything I do, you'll do too
'Cos you're every little part of me

Every little part of me, you're every little part of me
You're every little part of me
Every little part of me, you're every little part of me
