Life is a merciless fight  
No one can win  
Ally with your arch enemy  
You can't fail, you can't ruin  
Eliminate your fear to feed your hope  
Then kill, dig and bury!  
We just think we're human  
Making a perfect society  
A fair and honest lie  
That hides all the misery  
A million people die  
Behind this hypocrisy

Only one survive!  
Killer Instinct!  
And you gonna die!  
Killer Instinct!  
This is the life you live!

Killer Instinct!  
Killer Instinct!

Justice doesn't exist  
The hate create the death stream  
When anger and pain command  
Life lost the mean  
Pray looking to the heaven  
So you never see the hole you are in

It's the natural selection  
Existence is stiff  
This primal rage is destroying us  
No solution for this conflict  
The last stage of evolution  
Is another step to the cliff
