The fatal moments here  
We look to the sky  
Death is what we fear  
No saying goodbye  
The clouds gather round  
Sky opens wide  
See the bomb drop  
Now were all gonna die

Armageddon is here  
Embrace your fear  
Just close your eyes  
Breath in our demise  
Armageddon is here  
Embrace your fear  
Humanity's toll  
Is paid in full

Spinning through the sky  
Approaching the ground  
Death is dropped upon us  
With barely any sound  
Chaos consumes the city  
Riots are breaking loose  
Should we have any pity?  
For the future we all choose

Armageddon is here  
Embrace your fear  
Just close your eyes  
Breath in our demise  
Armageddon is here  
Embrace your fear  
Humanity's toll  
Is paid in full
