Fortunately you feel that once again -  
Temptation to oblivion, silence  
tears, gratification, improvement  
In the past it doesn't existed  
Existence between world of space  
And world of sufeit, brutality  
Absolutely entire contrast  
Conslation prize, searching  
Virtually, you have never used  
Assistance of visions - sensitive  
Exactly reflecting not - your thoughts  
But for you, inside you - real  
This is like there was nothing before...

Just now, maybe forever you have more  
You've obtained almost perfect execution  
It's nice - conquest, spread selfcontrol  
Irrational top of unadaptation  
You see the great picture -  
You're learning to understand the world -  
Stupefying gradation of pleased aims  
You hear perfect sounds  
You feel, nobody knows is that mercy, love  
compassion, craving or faith...
