Killing technologies stand over all  
Outer space war is the law  
You ask for the reasons, but nobody hears  
Shut up and don't spend no tears  
Production, destruction, senses wars  
Warfare into merciless death  
Living in fear you don't wanna hear  
What they shoot up into the stars

S.D.I. you'll never know why  
Your only right is to wait 'til you die

They rule the Earth, bullets fly  
Stupidity fills the scene  
Die and bleed out reality

There's no place for you to be  
The end is near feel the heat  
Nuclear war has begun  
You laugh over what you don't understand  
Oh God, what have they done?

Where is our world, explain it to me  
Look through the nuclear fog  
The end is the right thing to get free  
Insane pure hated shucks  
Congratulations we've got it right  
The never ending night  
Now it's too late to lose a word  
The signs of the dead, shine bright
