"Dream Of Me"

Take me with your arms and lift me up out of this life
Nightfall embraces me, I rise and find I am here
When I am with you the chains round my heart
disappear

Dream of me
Dream of me
I will be there
Calling your name from the shore

The sea was serene but she swam out too far and was
gone
He thought he heard her voice calling his name in the
wind
I will be with you each night when we kiss in your
dreams
Dream of me
Dream of me
I will be there
Calling your name from the shore

The first snow of winter is falling out over the sea
Dawn breaks into his dream pulling them gently apart
Lift me, forgive me and unlock these chains round my
heart

Dream of me
Dream of me
I will be there
Calling your name from the shore
