In my sanctum of disease  
I feed on your dying screams  
Entity of blasphemy  
Death will be your final plea  
Stainless steel against your skull  
Cortex shattered with one blow  
Cavity of clotted blood now is where  
Your face once was  
I know that you're dead  
Yet I can't seem to stop bashing  
Your skull  
The feeling is so real  
The pleasure I feel is unexplainable  
Bashed fucking skull [3x]  
Your flesh opens, tendons tear  
Partaking in the joy, indulging your fear  
Skull is split, split at the seams  
Blood bath insanity,  
I mute your screams  
Terrorized, face with no eyes  
Depleting fluids, brain on your thighs  
Bowels let loose, your body is drained  
Shit and blood mixed  
Wish your headless remains  
Scraping brains from your skull  
Lifeless body limp and cold [4x]  
Bashed fucking skull [2x]  
Black metal mayhem  
Ultra brutal part  
Bashed fucking skull [2x]
