Training children, trained to kill  
Teaching hatred, no free will  
Breeding perfect killing machines  
(You greedy f\*\*king bastards)  
Fathers take them on the hunt  
Video games of gore and blood  
Desensitizing them loss of life

For the sake of future children  
No war No war can be one

Just like they learn from T.V.  
Movies, games, and history  
He who kills the most is the biggest man  
(You're never gonna win)  
When little boys have little guns  
Little tanks and little bombs  
Training them to kill from day one

For the sake of future children  
No war No war can be one

For scholarship will you sell your soul?  
Killing babies while on patrol  
What's the price of innocent lives?  
(You're killing f\*\*king children)  
Too much, too much human greed  
In a fire storm of hell we lead  
The next evolution's extinction  
(And who will pay the price?)

For the sake of future children  
No war No war can be one
