The capitalists and communists - they lie, they lie  
The activists and pacifists - they lie, they lie  
The Media and their social cliques - they lie, they lie  
In Education and politics - they lie, they lie

They hold us down as children and they force into  
schools  
They force to obey the laws and then they break the  
rules  
They lie about the wars, about the names, about the  
places  
They lie about our country and they lie right to our  
faces

Leaders and religious fools - they lie, they lie  
Preachers and the know it alls - they lie, they lie  
Police and military rule - they lie, they lie  
Conservatives and liberals too - they lie, they lie

They hold us down as children and they force into  
schools  
They force to obey the laws and then they break the  
rules  
They lie about the wars, about the names, about the  
places  
They lie about our country and they lie right to our  
faces

The pigs that live in Washington - they lie, they lie  
Wasting time in the U.N. - they lie, they lie  
The shows you watch the books you read - they lie, they  
lie  
Controlling everything you need - they lie
