

Virulence "Texture Shock"

Visit "[Texture Shock](#)" on MotoLyrics.com

imprinting of solid crisp forms into soft clay
as culture is the architect of cognitive maze
walls and corridors simulate righteous edifice
foreign shapes categorized automatic dismiss
dyed tide. Divide
chaotic trees growing within black and yellow streets
...constitute subjective ocular geography
hopelessly conflicting
with constant radiating...
...white pillars supporting square colossal mountains
proud

fragile youth bleeds into Saharan desert sands
her round face stretches. featureless body bends
twig-like fingers reach toward the gushing stream

blade between thighs
spout of liquid for miles
we welcome you woman
be free as light in your smiling eyes
these plains are yours
delight for endless times
history's cerebral mutant gods
burning orb screeches with distant violin
liquid loathing streams in through window sill
tied divide died
multiple tools for identical use offends the eye
with contemplation mind rejoices at higher and higher
digressions from its branded norm of home
nonsensical daily acts morph to purified pathways
sewn
to refuse language. embrace noise
cognitively globalize
