Winternight

Mournfull cries are in my mind  
In this stormy winternight  
Paint a shadow on my heart  
A black cloud rains over me

See, this is me, no pleasure to see  
Still the dark cloud is surrounding me  
Scared, to be a different kind of my own  
And the storm is raging on and on

Cold winternight - no way out of the dark  
No one's leading me back  
To the place where I belong

Tried to breathe in rays of light  
I can't be without my winternight

See, this is me, no pleasure to see

Still the dark cloud is surrounding me  
Scared, to be a different kind of my own  
And the storm is raging on and on

Cold winternight - no way out of the dark  
No one's leading me back  
To the place where I belong  
Uncovered secrets will never be found  
No rebirth, no regrets never be the one to hold

Cold winternight - no way out of the dark  
No one's leading me back  
To the place where I belong  
Uncovered secrets will never be found  
No rebirth, no regrets  
Never be the one to hold.
