### "I'll Never Leave This Love Alive"

Visit "[I'll Never Leave This Love Alive](#)" on MotoLyrics.com

We loved each other such a long, long time  
It was so good, I was yours and you were mine  
But baby, something happened along the way  
I saw a change come over you like night and day  
Now it's killing me to know someone else is loving you  
My heart is turning black and blue

I'll never leave this love alive  
I'll never leave this love alive, oh no  
And if you break my heart again I know I'll die  
I'll never leave this love alive

Now, you don't know what goes th  
But every day my love gets lost in time  
And every night I have the strangest dream  
It gives me chills how real it seems  
I'm high up on a ledge, my back against the wall  
You whisper, "Jump," and then I fall

[Chorus]

Spare me the details, baby  
There ain't nothing good left to say  
Don't your conscience ever bother you  
To see me on my knees this way

[Chorus]
