### "Center Of The Universe, The"

Visit "[Center Of The Universe, The](#)" on MotoLyrics.com

At the center of the universe  
is a star-sucking hole  
and the lives of every planet  
are in danger as it grows

But it's not the thing that gets me down  
It's not the thing that brings me down

At the center of the earth  
where the heat can melt your brain  
All the molten lava  
comes pouring out like rain

But it's not the thing that gets me down  
It's the thing that brings me down

At the center of my heart  
is a beautiful girl  
and one tear from her face  
could destroy the world

It's the only thing that gets me down  
It's the only thing that gets me down  
It's the only thing that brings me down
