Grab our skins
And just rip'em if you want
You cannot scratch
What's underneath
Take my chance
And just keep it if you want
That will not help you
Breath easier
We are nothing but you
Chorus:
What we have is what we got
And it's too much for you to touch
What we have is too much
For you to even touch, oh no...
So you think
We will stumble or we'll fall
At least we have
The chance to fail
We are nothing but you
Chorus:
What we have is what we got

And it's too much for you to touch
What we have is too much
For you to even touch
I will run naked but will be the same
Though you need me to be oh so vulnerable
Wear my naughties just like beauty queens
Wear Armani fleece...
Chorus:
What we have is what we got
And it's too much for you to touch
What we have is too much
For you to even touch
We have always been like you
We will always be like you too
We have always been like you
We will always be
