I play the part and
Drown out all the bad dreams
And I can field the questions
Coming at me again

I want to know that you could
Could be my savior
Can't seem to shake this feeling
I wont see you again
Everytime I arch my back
Up at the ceiling
I can't forget the rush
that comes from screaming your name

The cars that pass remind me of that feeling
I pray that we don't speed to our end

You make it so hard to breathe
The way you always seem to be
The one that's waiting there for me

I try so hard to see
The good you say you find in me
The part I play in all your dreams

I know that you are half awake
Enough to hear me
I know those eyes
Pretending not to see what I sense
With every breath I hope
To draw out the sad things
And lay to rest the fear and the dread

You that fear of you can heat me like a fever
And just a touch or whisper in my ear does the same
The one relief comes from the pounding of the bass
strings
The lack of trust it makes me insane

You make it so hard to breathe
The way you always seem to be

The one that's waiting there for me

I try so hard to see
The good you say you find in me
The part I play in all your dreams

Come to me
You know how it feels
To have most everything you want
Just gathered up at your heels
You've got to come to me
To know what it means
That when you feel it in your fingertips
You know that it's real

You've got to come to me
You know how it feels
To have most everything you want
Just gathered up at your heels

You've got to come to me
To know what it means
That when you feel it in your fingertips
You know that it's real

Babe, it's so hard
So hard
Come to me

Come to me
You know how it feels
To have most everything you want
Just gathered up at your heels
You've got to come to me
To know what it means
That when you feel it in your fingertips
You know that it's real

You've got to come to me
