V1) Tonight

Wait for me to flash my lights  
Right at your bedroom door  
Just surrender in the darkness.  
And realize  
I don't want to talk about our yesterdays  
You never felt me fall away  
I'm sick of looking back.

Prech) So we'll drive tonight/Now I'm by your side  
As I see you sleep away the dreams you had of us last  
night  
You look so beautiful as I wake you up  
We don't have to think about the way home.

Ch) Don't say so long  
When all is said and done  
We pick apart the memories we thought we never had.  
But don't look back  
This curiosity won't answer questions from the past  
Just stay right here with me.

V2) Goodbye

Let's throw away the fears we had  
And never wonder why  
We could never say goodbye.  
It's too late  
You'll come with me so we could drive all night  
Drive past the stars from yesterday  
With your hand in mine.

V3) Don't say hello...

Just come with me tonight  
We'll drive until the dawn will break again...
