V1) I never saw you looking back  
When you were still asleep and dreaming dreams  
That separate us from between our own realities  
And time could never stand the test of time  
You were a Goddess with the wings an angel left  
behind tonight.

Ch) Don't wait  
To say goodbye to those you'll leave behind  
While heaven smiles at us from a place where angels  
never cry and  
Don't say  
I'll see you when tomorrow comes  
Tomorrow's just a promise (and promises are broken  
- everyday).

V2) Tonight let's find the time  
To say goodbye  
And kiss away your tears from  
Two nights ago when I was screaming things  
Of how you oughta be  
And though you said you'd find a place to hide  
And never speak to me  
Then I'd be broken on the inside  
You'd never know how much I loved you.

Br) Don't wait too long  
And watch the sun go down  
We're all too proud, to say out loud  
Don't leave me know  
Cause there ain't nothing we can't fix today  
Forgive ourselves for yesterday...
