"The Universe"

Visit "[The Universe](#)" on MotoLyrics.com

I am lost in our universe
Can anyone hear me
We are lost in our universe
Exactly where we want to be

I found my way out of this old maze
And I, I have won
I fought my way through complications
And I, I have won

Remind me to come back and save you
I'm constantly believing that were still just one
Remind me to come back and save you
It's falling into pieces but were still just one

In my universe
In my universe

I am lost in our universe
Can anyone hear me
We are lost in our universe
Exactly where we want to be

I found my way out of this old maze
And I, I have won
I fought my way through complications
And I, I have won

Remind me to come back and save you
I'm constantly believing that were still just one
Remind me to come back and save you
It's falling into pieces but were still just one
