Visit "[Necrosing Hepatic Pangertitus Of Gomerus Epigastic Dysentery](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Disease infected human torso Of malignant bile and  
Cancer Decrepitated festering gore drenched innards  
And hepatic liverworts Bubbling festering deadly sin  
Sludge, puss, and wretched vomit Spills forth from the  
Abdomen Inflammatory intestinal disorder Erupted  
Internal duodenums tract Rot and filth consume your  
Carcass Making your innards contort and fight Puss  
and

Phlegm fill your lungs Your body is suffering a slow  
Death Necrotic Hepatic Epigastic Dysentery The death  
Of Cells and tissue mass Pangertorial pustuler fate  
Corrupt body of malignant meat Disease infected  
human

Torso Of malignant bile and cancer Decrepitated  
Festering gore drenched innards And hepatic liver  
Warts Bubbling festering deadly sin Bright red puss  
Flows from your mouth Thrust up from your exploding  
Gut Acidic rancid pustaler juices Severely scorched  
And corroded your throat You choke and gag, throwing  
Up organs As your vital parts turn to mush Death is  
Immanent as your body shuts down And your eyes  
grow

Black and cold Festering fungal rancid flesh Sin  
Inflicted Human dermis Filth riddled cankerous carcass  
Retched diseased rotting rind
