### "A Lesson In Virulence"

Erased into nothingness, escaping the memories  
A vast pain slowly consumes, regurgitated intestines  
erupts

Genetic invention created from science  
Lethal injection, infection that lives inside blood

Covered in virus, evolutions solution  
Unstoppable vision, genocide the price to pay

Blood covered satisfaction the cremation aftermath  
Massacred in vain, taunted death revealed  
Human body forge, science painful nature  
Studies of the objects life, the art of torture

Erased into nothingness, escaping the memories  
A vast pain slowly consumes, regurgitated intestines  
erupts

An end to all things, in the presence of hate  
The path of blood, a never ending apocalypse

Erased into nothingness, escaping the memories  
A vast pain slowly consumes, regurgitated intestines  
erupts
