

## Vomiturition "Unsuceeded"

Visit "[Unsuceeded](#)" on MotoLyrics.com

Lack of success in the start  
Umbilical cord around neck  
Whispers (from the other side) heard for the first time  
Summoning to a stable state

Unsuccessfully died for the first time  
Body holding enough life to survive

Too long without oxygen  
Major braindamage created  
Just survived from the death  
Unable to communicate

Totally unsuceeded as a child  
No-one to care for or to live by  
Totally unsuceeded life  
Nothing to live for - no way to die

Life's passing by - Institutionalized  
Can't understand when to feel good or bad

Parents passed away in an ancient  
Relatives couldn't take the shame  
Pushed in orphanage all alone  
Left in there without a friendly soul

Totally unsuceeded as a child  
No-one to care for or to live by  
Totally unsuceeded life  
Nothing to live for - no way to die

From institution to another  
Meaningless transportation of disabled
