No persona hypocrites,  
"Suit-and-tie-guy" politics,  
Phony media derelicts.  
It's not what we represent.  
Corporate environment  
Affecting the way I live,  
Created by the government.  
It's not what we represent.

Oil, gas and prices,  
Rise above the U.S. masses,  
Say good bye to middle class.  
It's not what we represent.  
Fighting in a foreign land,  
Killing someone in Baghdad.  
Don't even know the other man.  
It's not what we represent.  
Vote for someone else's plan,  
One that we don't understand.  
Take your soul, guiding your hand,  
It's not what we represent.  
Censorship dehumanised,  
Human struggles televised.  
For the sake of bottom lines,  
It's not what we represent.

We represent what's left,  
We represent the generation next.  
We represent what's left,  
What's going to become of you and me?

We represent what's left,  
We represent the generation next.  
We represent what's left,  
What's going to become of you and me?
