"Let's Get Started"

Visit "[Let's Get Started](#)" on MotoLyrics.com

There had to come a time
You'd soon realize
That we've always been in love
Just look in my eyes
Let's get started
Let's get started

Love you through the night
I'll make you feel right
Now that heaven's out of sight
Just give me your love
Let's get started
Let's get started

You were something to my life
That I'd never had before
Was a special kind of love
That was so new
And I had always looked
To find the key to fit the door
Well, I found it on the day
That I met you

Let's get started, started
Let's get started tonight
Let's get started, started

Love has got to grow
Come on let it show
If you stay I've got to know
Just give me your love
Let's get started
Let's get started

Love you through the night
I'll make you feel right
Now that heaven's out of sight
Just give me your love
Let's get started
Let's get started

You were something to my life
That I'd never had before
Was a special kind of love
That was so new
And I had always looked
To find the key to fit the door
Well, I found it on the day
That I met you

Let's get started, started
Let's get started tonight
Let's get started, started
One will get started tonight

There had to come a time
You'd soon realize
That we've always been in love
Just look in my eyes
Let's get started
Let's get started

You were something to my life
That I'd never had before
Was a special kind of love
That was so new
And I had always looked to find
The key to fit the door
Well, I found it that day
That I met you

Let's get started, started
Let's get started tonight
Let's get started, started
Let's get started tonight

Let's get started, started
Let's get started tonight

Let's get started, started
Let's get started tonight

Let's get started, started
Let's get started tonight

Let's get started, started
