Like I said I would return  
Cryogenically preserved  
But you've got cold shoulders for me to lean on

I can't forget you girl  
I don't remember how to spell your name

[Chorus:]  
The oxygen I breathe, you are my favorite dream  
You're my poison air, you are my nightmare  
In constant misery, it's still a mystery  
Why I love you and you can't stand me

I've got a better place waiting for you  
I've got a better place waiting for you out there  
If we hold on, we can roll on  
Be together, tie your sweater.  
A little closer my princess.  
You're a noose and I'm a neck,  
Oh aren't we so perfect for each other.

Stranger things have occurred  
Three in the furnace, four were seen unburned.

You're the quiet stream, you're my favorite dream  
You're my poison air, you are my nightmare  
In constant misery, it's still a mystery  
Why I love you and you can't stand me

I can't forget you girl refresh me on your name.  
I call you every night we play a little game.  
You're smile and bat your eyes. I'll be back here again  
That's just the way it always ends.  
Who am I talking to? I always get it wrong  
This one goes out to you an adoration song.  
And maybe you will fall just like Narcisus fell,  
And be a flower by the well.  
I don't want your love no more.

The oxygen I breathe, you are my favorite dream  
You're my poison air, you are my nightmare

In constant misery it's still a mystery  
Why I love you and you can't stand me.
