This could have been disaster
could have been the worst day of my life
I felt my heart beat faster
when you told me that you had big news

I thought you might pop the question
Or ask me to move in
Make a mistake if I didn't think twice
But my heart sank again
and I decided what I had to do

Oh no, I let you go
I should probably feel bad I know
But I kicked off my shoes
and everything else kinda followed...

I've got nothing on but the radio
Dancing around my room with the lights down low
Nothing on but the radio
turning it up so loud
that the neighbours know I'm happy with you gone
Nothing but the radio on

Nothing on

My boss liked to tease me
Didn't believe me when I said it was rude
that he'd give me a raise
if I laughed at his stupid jokes

I wouldn't give the satisfaction
of a reaction
Then he invited me to his room
to get paid
And I told him where his raise could go

Oh no, I lost it so
I should probably feel scared and low
But when I got home, I kicked off my shoes and you
know?

I got nothing on but the radio
Dancing around my room with the lights down low
Nothing on but the radio
turning it up so loud
that the neighbours know I?m happy with you gone
And nothing but the radio on

Yes it?s me that you see through the window
With my hands in the air waving you hello
I don?t care if it?s crazy, I?m happy at being alone

Nothing on but the radio letting it all hang out
Nothing on but the radio turning it up so loud
Singing to a hairbrush microphone
?cause I?m happy now I?ve got?

Nothing on but the radio, no

Nothing on but the radio
Dancing around my room with the lights down low
Nothing on but the radio
turning it up so loud
that the neighbours know I?m happy with you gone

And nothing but the radio
Nothing on but the radio
Nothing on
Nothing on but the radio
And I got Nothing on????.
