I could make you love me

I could make you wa-ant me

I could make you love me

I could make you ha-appy

I could make you love me

I'll make you lo-o-ove me - huh

When the moon is your silent partner

To the night of a friendly crime

The star light can bring desire

In the darkness I'll make you mine

I could make you love me

I could make you wa-ant me

I could make you love me

I could make you ha-appy

I could make you love me

I'll make you lo-o-ove me - huh

When the sky is a burnin' bubble

And the beatin' of my heart is high

You can feel all the air, electric

'Cause your heart and your soul are iron

I could make you love me...

Yeah -

When the world moves us all in motion

And the twilight has time to cry

I will see through your commotion

I can tell you the reason why

That's right

I could make you love me

I could make you love me

I could, I could, I could, I could, I could

I could make you love me

I could make you love me

I could make you love me

I could make you love me ...
