With The Newcomers

Here I stand
All alone in my lonely world
All alone waiting for the girl
Yes and here I stand

Here I stand
All alone in my world of dreams
All alone with just your memory
Yes and here I stand

You say love, love, love you so
Love, love, don't you know
Love, love, don't you know I love you so

You don't know
You don't know how much I care
You don't know the torch I bear
Yes but here I stand

Here I stand
Underneath the stars above
Waiting for you to bring your love
Yes and here I stand

You say love, love, love you so
Love, love, don't you know
Love, love, don't you know I love you so

If you need, if you need a heart that's true
If you need someone to love you
Yes and here I'll stand
