Got a long list of things to do  
It begins and ends with gettin' over you  
I can't quit 'til I'm through  
I get up with the sun and go down with the moon

Chorus:

Pain and tears  
Can't be all there is  
Is it any wonder I'm feeling six feet under  
Baby you're nothing but too much trouble  
Gotta bury this love and bury the shovel  
Gonna dig me a hole and make it deep  
Gonna lay down what's left of us  
And then put this thing to sleep  
Let my soul rest in peace  
Gotta nail down the lid  
On these stone cold memories

'Cause

Chorus

I'm gonna hold on tight to what I've got  
And not worry 'bout what I've missed  
Someday I'm gonna leave this world  
Knowing that I've been blessed  
Even if it never gets better than this  
(Repeat)
