Straight up strong and steady
Hard falls I don't take any
Both feet beneath me
Firmly on the ground
But each time I see you comin'
The earth moves
Girl you're somethin'
I start right into stumblin'
Catch me now
I'm heart over head over heels over you
Look at what I fell into
You throw me girl like a tumbleweed on a Tilt-A-Whirl
I'm all turned around, got my down side up
Either way it looks like what they say about me true
love's true
'Cause I'm heart over head over heels over you
I need you to hold me real tight
Next thing you know I just might
Break loose and I could fly right into the stratosphere
Oh girl, are you with me
Do you feel a little dizzy
This view is a thing of beauty
Way up here
I'm heart over head over heels over you
Look at what I fell into
You throw me girl like a tumbleweed on a Tilt-A-Whirl
I'm all turned around, got my down side up
Either way it looks like what they say about me true
love's true
'Cause I'm heart over head over heels over you
