Long time ago, before the iceage, people lived in  
perfect harmony with the nature in a system that didn't  
give possibility for overpopulation

As the aksel of the planet (plan-et) was in its right  
position, straight, all the planet was under stable  
tropical elimat. So was also Odenmaa at the northpole  
There lived the Asers who held the highest knowledge  
on earth with the ROT (root) -language. Outside  
Odenmaa lived the vaers in their ringlands.

Everybody paid respect to Per who due to the  
breeding-system was the allfather of all mankind  
(everyone is a PER-SON)

Over 50 milj. 10000 years ago the aksel of the planet  
shifted and caused the iceage when the ringlands  
outside were covered by ice, a perioid called  
ALT-LAND-IS ALL LAND'S ICE

As the Gulfstream came to heat south-Finland,  
Odenmaa remained clear of ice and the Asers learned  
a new way of life

Agriculture and new animal species were created for  
staying alive for 50 milj. years surrounded by huge

icebergs

As the ice started to melt and drown Odenmaa the  
very few of them left took pairs of the animals with  
them and sailed through a passage way melted by the  
stream to Bockland an island outside of Sweden,  
later named Goatland (Gotland).

After staying there for a thousand years the Asers  
headed back to Odenmaa except SVEN and DAN who  
went to

Sweden and Denmark to rehabilitate the ringlands.

During ALTLANDIS the Vaners developed into ten  
different races, mythologies and languages outside  
the icebergs

The asers lived in Odenmaa again till the year 1050  
when the crusader army sent by the Pope  
destroyed Odenmaa and created a new information  
system based on the written word not spoken as it  
used to be.

This is a tiny part of a story that takes 20 years to tell  
two hours a day brought to us as family tradition by  
the last Aser since 1984, according to the saga  
10 000 years after the end of the iceage
