Hush now, let's not end before we start
Hush now, lay a whisper on my heart
Time flies, when you're lying next to me
Your eyes, are the only thing I see
Let's make this moment last
Try not to move too fast
Just bring your lips to my ear
Don't say you love me,
Don't say you love me yeah
Don't say you need me,
Some things are better left unsaid
But if you feel the same, just whisper
Whisper my name
If you feel the same, just whisper
My name
Time flies, when your body's close to mine
Your eyes, sending shivers down my spine
Let's make this moment last
Try not to move too fast
Just bring your lips to my ear
Hush now, let's not end before we start
Hush now, lay a whisper on my heart
Don't say you love me,
Don't say you love me yeah
Don't say you need me,
Some things are better left unsaid
But if you feel the same, just whisper
Whisper my name
If you feel the same just whisper
My name
But if you feel the same, just whisper
Whisper my name
If you feel the same, just whisper
My name
