"You Can Let Me Down"

Let me feel the scars on your heart
So I can sing you to sleep
Let me touch the tears as you cry
So I can hold you as you weep

You don't have to keep it all inside
I will keep your secrets like their mine

CHORUS:

So you can fly or you can fall
You can even lose it all
I'm gonna love you
You can let me
Hurt for you a little while
Just until see your smile
You can let me, you can let me down

I need to be the place in this world
You wanna run to always find peace
I love you when the hope is all gone
I love you strong and I love you weak, yeah

Whether you triumph or break
You know I'll stand beside you either way

CHORUS

And every time you need me
I love you more believe me
I'm here
