The Einstein Crew

Do you know about the Einstein crew?
Do you know what they do?
They're always drinking never thinking
Just looking for someone they can
Take and beat down they say they hate that guy
But when I ask how come they don't know why
They're so damn full af hate but do you think they're
smart enough to hate themselves too
So now you got your crew behind and behind you even
left your mind come on and step to me
Kick me, and I'll kiss your back, after three six-packs,
hope it feels alright, before I get the chance to ask you
why
Do you know about the Einstein crew? I hope you do
because they hate you too next they'll be kicking you
Just because you're smarter than their whole crew
Some of the were buggin' me when I asked them about
the history do you really believe these guys they're
stereotypes so stereotype
But who am I to say who am I to judge
Who would ever listen to a guy called Fudge

The Einstein crew, I could be your role model,
One or two got their own pro model,
We feel sorry for you, you're one
Big problem and some day you'll be sorry too
