"High"

Visit "[High](#)" on MotoLyrics.com

Last night I had a dream about you
and how you fit in my naked life
Mistakes, I guess I made a few
here and there and from time to time
Yeah, oh yeah....

I know, Lord I dreamed about it
every detail and every move
I'm sure, there's no doubt about it
I'm trying to break through to you

And all, all that I want
is a moment of your precious time
And all, all it would take
is let me come over to your side
I think you know how to make me feel... high

I've tried several other people
came close a few times but then
it just broke down
I won't lie, I won't kid about it
Merry come round and round

And all, all that I want
is a moment of your precious time
And all, all it would take
is let me come over to your side
I think you know how to make me feel... high

Hey love, hold me close,
pull me in, don't let go
Faith and love aren't enough
I should know, give me hope, let it show

And all, all that I want
is a moment of your precious time
And all, all it would take
is let me come over to your side
I think you know how to make me feel... high
