Insane Bill Nelson:

And you know how yeah there's like muscular
Like you know sometimes you know you think your
You know you got really red nuts or something
You know real squishy or whatever
Then you got sort of a hard muscular flex if you would
Well let's say there's a total lack of muscular flex
Which leaves more room for a lot more blood
Which is really dull and throbbing
Muscular you can flex when you know you're not really
getting in there
You're not getting as much flesh
You know you think there's more flesh there
But you're actually getting more flesh more blood
That's what you want to bite into don't you think?
Korpserape: Yeah
