How does it happen  
do you not hear my word  
all day in me  
i take turns  
got me surrounded  
although i am alone  
they made me forget  
how to throw stone  
running the distance  
why am i standing still  
always descending  
even up hill  
do you evolve  
& how do you get here  
can you demolish  
now that you're here  
this god is a plot  
this life is a farse  
this god is a plot  
a game in his name

how can i sever  
when there's no unit here  
searching for root but  
there's no ground here  
travel to settle  
where can i find some rest  
making mistakes i learn  
from the best  
gaurding the answers  
safely under your skin  
protect the secret  
in this dustbin  
when will i solve  
this revealing puzzle here  
searching for answers  
till the end's near
