Tonight we fight
There's gonna be a war tonight
So fall in and believe in me
There's gonna be a war tonight
Mother, Father
There's gonna be a war tonight
Tonight, tonight, tonight
There's gonna be a war
This time they've gone too far
Get out now before it's too late

So believe in me
I will never let you down
Or at least I haven't yet
But believe me when I tell you
There's gonna be a war
You can't escape it
Can't explain it
But it's knockin
On your front door
And the world you knew before
You can kiss it goodbye
Cuz before this is over
We're all going to die

All we want is what is ours
Not one penny more
But we're a long way from home
And everything we know
Is a dark and lonely road
Headed to nowhere

So believe in me
I will never let you down
Or at least I haven't yet
So believe in me
There's gonna be a war
You can't escape it
Can't erase it
But it's knockin on your door
And the world you knew before

You can kiss it goodbye
Cuz before this is over
We're all going to die

All we want is what is ours
Not one penny more
But we're a long way from home
And everything we know
Is a dark and lonely road
Headed to nowhere

Tonight we fight
There's gonna be a war tonight
So fall in and believe in me
There's gonna be a war tonight
Mother, Father
There's gonna be a war tonight
Tonight, tonight, tonight
There's gonna be a war
This time they've gone too far
Get out now before it's too late

All we want is what is ours
Not one penny more
But we're a long way from home
And everything we know
Is a dark and lonely road
Headed to nowhere
