I've seen all this before,
Try to paddle against the waves,
No-where near the shore,

I'll try to lead you in to the light,
Just promise me you won't give up,
At least go out with a fight,
Just promise me you'll give me the chance,
To make things alright

Get out while you can,
Today's the day you have the choice to
Get out while you can
But take my advice it's better for you to [x2]

Goodbye's so easy,
Just think about the ones that love you the most
It's going to be hard if you don't trust yourself

I'll try to lead you into the light
Just promise me you won't give up
At least go out with a fight
Just promise me you'll give me the chance
To make things alright

Get out while you can,
Today's the day you have the choice to
Get out while you can
But take my advice it's better for you to [x2]

Just take a look and you'll see
It's not so bad, it's not so bad

Get out while you can,
Today's the day you have the choice to
Get out while you can
But take my advice it's better for you to [x2]

Get out while you can [x2]
