Saw us come crashing down
Falling to the ground
The next girl that comes haunting
Crawling through the town
I sit here in my hotel
Under lighting streets
Hoping the end will come
Catch me as I wander
Through the open sea

Hook me and we'll find me
And I will found
Out my name
For everyone to hear

The way you
Feel when I'm around
Something unpredictable
My view about you now
The way you
Feel when I'm around
Gasping every single breath
We're sharpening our blades
We're all the same

We're all the same in this world
Higher than ourselves
We're bleeding on the asphalt
Sorely breaking down
We're hiding in the darkness
For everyone to see

Hook me and we'll find me
And I will found
Out my name
For everyone to hear

The way you
Feel when I'm around
Something unpredictable
My view about you now

The way you
Feel when I'm around
Gasping every single breath
We're sharpening our blades
We're all the same
(The same, the same)
We are all the same
(The same, the same)

We are all the same
Until we take ourselves back down
In the piece of wreckage
Of our hearts
With our blames we are not the ones who left you here
With the sun peering right over our ideas
In the piece of wreckage
Of our hearts
With our blames, yeah

The way you
Feel when I'm around
Something unpredictable
My view about you now
The way you
Feel when I'm around
Gasping every single breath
We're sharpening our blades
We're all the same
The way you
Feel when I'm around
Something unpredictable
My view about you now
The way you
Feel when I'm around
Gasping every single breath
We're sharpening our blades
