I've got a feeling to stay
It beats the feeling to go
I've got a feeling I'll wait so I can know
What really could have been
Much more than time well spent
I got a feeling that I can't let this end

So let's make champagne
Rain down from the sky
And let's toast to the night

It's the time of our lives
Take me for a ride
And kiss me one more time
'Cause even if we fall we'll be okay
Grab hold of your heart
Let's spin the world from the light
So we stay here tonight

Can we stay here tonight?
Spin the world from the light
Can we stay here tonight?
Let's spin the world from the light

You've got a reason to stay
I've got the hand you can hold
I'm kind of feeling insane
So don't let go

And as the sun goes down
And all the dark surrounds
I get the feeling we can't run home
Not now

So let's make champagne
Rain down from the sky
And let's toast to the night

It's the time of our lives
Take me for a ride
And kiss me one more time
'Cause even if we fall we'll be okay

Grab hold of your heart
Let's spin the world from the light
So we stay here tonight

Can we stay here tonight?
Spin the world from the light
Can we stay here tonight?
Let's spin the world from the light

Don't wait
Everything's not okay
I am slipping away
Don't say goodbye
Kiss me
And let me know you love me
Underneath the moonlight
We'll look to the sky

Let's toast to the night
It's the time of our lives
Take me for a ride
And kiss me one more time
'Cause even if we fall we'll be okay
Grab hold of your heart
Let's spin the world from the light

And let's toast to the night
It's the time of our lives
Take me for a ride
And kiss me one more time
'Cause even if we fall we'll be okay
Grab hold of your heart
Let's spin the world from the light
So we stay here tonight

Can we stay here tonight?
Spin the world from the light
Can we stay here tonight?
Let's spin the world from the light
