"Wish You Would Stay"

Visit "[Wish You Would Stay](#)" on MotoLyrics.com

You've got it going on
And I think that you should know
I like the way you move and the things you do
Yeah all the things you do

And it's the feeling I get inside
That keeps me up at night

Cause every time I see you baby
It drives me crazy
And you don't even know
And everything you do or say
Feels so far away
But I just wish that you would stay

So come a little closer and breath in deep
Yeah, put your trust in me
Just take it slow, but let's get moving
This is what you need

Cause every time I see you baby
It drives me crazy
And you don't even know
And everything you do or say
Feels so far away
But I just wish that you would stay
Yeah, I just wish that you would stay

Cause every time I see you baby
It drives me crazy
And you don't even know
And everything you do or say
Feels so far away
But I just wish that you would stay

Yeah, I just wish that you would stay
Yeah, I just wish that you would stay
Yeah, I just wish that you would stay
Yeah, I just wish that you would stay
