

Weltenbrand "Among Them"

Visit "[Among Them](#)" on MotoLyrics.com

In former times many women from Triesenberg worked
at the factory down in Triesen
One lady from Steinort had one day looked at the clock
and thought that it was high time to go work
On her way she heard some muttering
She continued to walk then heard people pray and she
suddenly was among the people of the night
It was impossible to emerge from the procession and
she simply had to cross the street with them when the
people of the night passed the church the daybreak
bells rang
And suddenly she was once again alone on the road
and it seemed to her as if the people of the night had
disappeared at a slant through the ground
The next day a young girl from Steinort was dead
