See her later out of her house
She is going to do it herself
Bit of stupidity
I understand
But like this?

Quit that job and go on blow someone else
You have to do it to yourself
But being stuck is not a choice
Get out now

All you have to do is just relax
Who says you have to think to come up with something
brilliant
Let go of those frames you've never fit
Not you not nobody

I bought trousers, this morning, with the strangest
colors [DãfÂ©modÃfÂ©]
The most I could find
[Are you happy?] I'm with them
cause I know they're really not a thing like that, so
See her later out of her house...

Quit that job and go on blow someone else
You have to do it to yourself
But being stuck is not a choice
Get out now

Once upon a time someone said
You should choose the right pill
So well I'm with both of them in my stomach
And a few more that I found somewhere around

You should continue partying with yourself
[Adoring] and let go of your mask collection
[Trousers] buy them, dãfÂ©modÃfÂ©, colorful
Dress real life and change your ways for me, girl
