[Werd:]

What are you like you say that it's shite  
Like whenever I write they say aye right  
But it's my life and here is a mic  
So to be honest mate I will do what I like  
I used to invest in some bars of weed  
But these days these bars are like all I need  
Some pubs and the clubs give my heart for the  
diamonds  
Until I get the spade and I'm buried in the silence  
Underground but I aim for the clouds  
I got my feet on the ground well at least for now  
I need bread got the yeast the now  
I'm trying to heat it up a little or I'm trickling out  
But every track every track is a stepping stone  
I move past like fuck who I'm stepping on  
I love the scene it's all peace don't get me wrong  
But sometimes I feel it's all just a stepping stone  
Maybe not maybe I was just getting stoned  
Thinking about my life too much as I was getting on  
Maybe I should call quits and just switch my tone  
Maybe so but no cause this is home  
And it's my life and this is my mic  
So hear me out mate this is what I'm like  
It's just a thought or maybe not  
Thinking my CD was something to cop  
See I thought people would start buying  
Thought they would come to the shows stop lying  
Thought they would show respect for me trying  
Maybe next day see a new son rising  
Things don't happen like that  
Couple years later I'm still sat at the back  
Still have to live while having the fact  
I always been a fucking loser I just happen to rap  
But every track every track is a stepping stone  
I move past like fuck who I'm stepping on  
As I jump to the next I get better known  
But still ain't really shit that's why I moan  
Like these guys don't even say nothing  
Drugs and the guns then it's back to the fronting  
I swear mate I should of see it coming  
Fakes the new real if I quote Joe Budden

I roll my weed and put another bud in  
Knock at my door and I go and let my bud in  
Another day mate and all we do is nothing  
I'm bored of this beef turn my back to the fronting  
See raps full of zombies and I ain't dead yet  
Killing UK cunts thinking it's Dead Set  
Yes cause I dead sets ok now get set  
Run tracks fuck rap this is the next step  
Record on a PC it's still poor quality  
But every time I do it it's still pure quality  
Never take holiday one of my policies  
Don't like the law so fuck what the police says  
Putting up notices asking you to notice me  
Just get my voice and my name so you know it's me  
You want to slag great take a note of you  
See you at a show with a blade and I'm poking you  
Just joking mate I know it ain't fair though  
I'm not in your circle so you ask me for square goes  
If I had a gun shoot at clowns like some fair shows  
Scotland stand up but I take a chair though  
Cause people here first still act like it's their turf  
Don't want the new kids like adoption at birth  
It's like I'm adopting and plotting the worst  
Thing to come out of Scotland since they heroin fucks  
But every track every track is a stepping stone  
I move past like fuck who I'm stepping on  
If your offended by something I say  
Then Say it to my face or get the fuck out the way  
I went the fuck out the way just to make a CD  
Done production and cutting you know it was me  
All the pressing the stressing the artwork you see  
Used to think ad just rap how blind could I be  
I should of had CDs they got held back  
That was? mate I can't help that  
Who to deal with I wasn't telt that  
I learn from mistakes I just hope that they shelf that  
And this rap thing is killing me  
Looking at the real like it really ain't real to me  
Got to get a deal the day and that's what dealing with  
But your so touchy you really ain't feeling me  
So I write a verse start putting it down  
Only for a bunch of cunts to start putting me down  
It's like they was stupid to doubt  
It's me and Deek mate we ain't needing you now  
Cause every track every track is a stepping stone  
I move past like fuck who I'm stepping on
