[Werd:]

Right listen some people go and rap about politics

And at the same time try and make money off of it

Looking at the media like I'm going to follow

So on this track every line I am crossing it

Wake up live another day

Work hard eat sleep no play

Wake up live another day

But your eyes stayed closed anyway [x2]

Wake up

I think we're stuck in the system

It sounds savage but I reckon you should listen

Cameras got you on the face recognition

Watching you walk in the place that you live in

Is you a villain? have you ever been to prison

Nah so why you on their damn television

Did you pay tax for that was that willing

But over in Irque (oh that) whose that killing

Is that why I'm working

To pay for your war and people that you hurting

If Google earth is open to the public

Just imagine what the government is surfing

They Don't look too far

See where you are with the sat-nav car

The mobile phone from the signal and bars

Hi I'm a number on a I.D. card

Wake up live another day

Work hard eat sleep no play

Wake up live another day

But your eyes stayed closed anyway [x2]

A free world is not much to ask for

So how come I got a chip in ma passport

How come they can let bombs fall

When kids get locked up just for spraying on walls

Like damn are we really the problem

Do kids kill kids these days out of boredom

With some help you know we could have solved them

But you don't want these kids like just abort them

And that's legal Jesus so evil

Stop being bigger than Christ your not Beetles

Some are born with the mum on the needle

How can you relate or dictate what we do

Wake up live another day

Work hard eat sleep no play

Wake up live another day

But your eyes stayed closed anyway [x2]

Wait a sec who I'm I to complain
Why is no one talking that's copping the fame
It's plain that the pain was the same with them
But I guess they forget when they gave him a chain
Gave him a plane
So he don't ask why as he fly's over home
It's dark and grey is Scotland insane
The weathers so bad you can swim when it rains
That's a metaphor weather is emotion
It's all in the drain as the wains get soaking
Get a drink get a knife get smoking
Media feeding ya sets it in motion
All lies so put me on the station
To say the same shit that we say from the pavement
It's just me I make observations
I know for a fact that a track won't change things
Wake up live another day
Work hard eat sleep no play
Wake up live another day
But your eyes stayed closed anyway [x2]
UK wake up
Scotland wake up
Edinburgh Alude Reekie wake up
